### EMPLOYMENT

|                   |  |
|-------------------|--|
|                   | <b>University of Cape Town</b>   |
| Since 01/2018     | Associate Professor (with tenure) African Institute of Financial Markets and Risk Management and School of Economics |
| 11/2014 - 12/2017 | Senior Lecturer, African Institute of Financial Markets and Risk Management, and School of Economics                 |
| 06/2013 – 10/2014 | Old Mutual Emerging Markets Lecturer, Graduate School of Business  |
| Since 04/2017     | Director, UCT Financial Innovation Lab   |
|                   | <b>Deutsche Bundesbank</b>   |
| Since 06/2012     | Research Economist in Banking Supervision and -Regulation (part-time since 06/2013)                                  |

### ACADEMIC POSITIONS

|                 |  |
|-----------------|--|
|                 | <b>Goethe University Frankfurt</b>                                   |
| Since 06/2014   | Research Associate, Excellence Cluster SAFE, House of Finance        |
|                 | <b>Oxford University</b>   |
| Since 12/2016   | Research Associate, Oxford Martin School for the 21st Century (INET) |
| 03/2012-03/2014 | Collaborating Research Scholar, Network Cluster, Keble College       |
|                 | <b>Columbia University</b>   |
| Since 01/2017   | Affiliate, Center for Global Legal Transformation                    |

### EDUCATION

|                   |   |
|-------------------|---|
|                   | <b>Universidad Carlos III de Madrid</b>   |
| 10/2011 – 06/2012 | Postdoctoral Researcher, Interdisciplinary Group of Complex Systems Research, Departamento de Matemáticas   |
|                   | <b>Friedrich-Schiller-Universität Jena</b>  |
| 05/2008 – 09/2011 | PhD in Economics ( <i>summa cum laude</i> ), Dissertation title: „Systemic Risk in Interbank Markets“, Supervisor: PD Dr Markus Pasche, Prof Dr Andre Freytag |
|                   | <b>New York University Stern School of Business</b>   |
| 02/2011 – 04/2011 | Visiting Scholar (Prof Viral V. Acharya, PhD)   |
|                   | <b>University of Karlsruhe</b>  |
| 10/2000 - 12/2005 | Diploma in Physics ( <i>final mark:1.8</i> ), Title of diploma thesis: „Interference Effects in Vector-boson Fusion“, Supervisor: Prof Dr Dieter Zeppenfeld   |

## VISITING POSITIONS

|                   |  |
|-------------------|--|
| 01/2016-02/2016   | Columbia Business School (Decision, Risk, and Operations)                                    |
| 04/2014 –05/2014  | Princeton University (Bendheim Center for Finance)   |
| 1/2014            | Federal Reserve Bank of New York (Money & Payments, Financial Institutions, Capital Markets) |
| 12/2012 – 01/2013 | Xiamen University (Wang Yanan Institute)   |
| 2012 , 2013       | University of Oxford (Saïd Business School)  |

## PROFESSIONAL EXPERIENCE AND CONSULTING

Banco Central do Brazil (2013), Bank of Uganda (2013), Banque de France (2011), South African Reserve Bank (2015, 2011, 2010), Deutsche Bundesbank (2010)

## PUBLICATIONS IN PEER-REVIEWED JOURNALS

1. „Information Contagion and Systemic Risk“ (with Toni Ahnert, Bank of Canada), Journal of Financial Stability, ([in press](#))
2. „Contagious Herding and Endogenous Network Formation in Financial Networks“ (with Christoph Aymanns, Oxford), Journal of Banking and Finance 50(1), 273-285, (2015)
3. „Revealing Patterns of Local Species Richness Along Environmental Gradients with a Novel Network Tool“ (with Mara Baudena, Utrecht, Angel Sanchez, UC3M, Paloma Ruiz-Benito Stirling, Miguel A. Rodriguez Alcalá, Miguel A. Zavala, Alcalá, and Max Rietkerk, Utrecht), Nature Scientific Reports 5, 11561, (2015)
4. „Complex Derivatives“ (with Stefano Battiston, Zurich, Guido Caldarelli, IMT Lucca, Roberto M. May, Oxford University, and Joseph E. Stiglitz, Columbia University); Nature Physics Vol. 9, No. 3, (2013)
5. Georg, Co-Pierre, „The Effect of the Interbank Network Structure on Contagion and Common Shocks“, Journal of Banking and Finance 37(7), 2216-2228 (2013)

## POLICY AND OTHER PUBLICATIONS

1. „Systemic Risk in the Financial Sector“, with Ian Goldin, Oxford University, Mila Mariathasan, KU Leuven, and Tiffany Vogel, University of Oxford. In: „The Butterfly Defeat: Globalization and Systemic Risk“, Ian Goldin and Mike Mariathasan, Princeton University Press (2013)
2. Brink, Nicola and Georg, Co-Pierre, „Note on Systemic Risk in the South African Interbank Market“, Special Note in the Financial Stability Review, South African Reserve Bank Magazine, 2011, (2011).

## WORKING PAPERS

1. *Fake News in Social Networks* (with Christoph Aymanns, St Gallen and Jakob Foerster, Oxford). Submitted. Available on [SSRN](#)  
**Abstract:**  
We model the spread of news as a social learning game on a network. Agents can either endorse or oppose a claim made in a piece of news, which itself may be either true or false. Agents base their decision on a private signal and their neighbors' past actions. Given these inputs, agents follow strategies derived via multi-agent deep reinforcement learning.

learning and receive utility from acting in accordance with the veracity of claims. framework yields strategies with agent utility close to a theoretical, Bayes opt benchmark, while remaining flexible to model re-specification. Optimized strategies a agents to correctly identify most false claims, when all agents receive unbiased pri signals. However, an adversary's attempt to spread fake news by targeting a subs agents with a biased private signal can be successful. Even more so when the adver: has information about agents' network position or private signal. When agents are av of the presence of an adversary they re-optimize their strategies in the training stage the adversary's attack is less effective. Hence, exposing agents to the possibility of news can be an effective way to curtail the spread of fake news in social networks. results also highlight that information about the users' private beliefs and their s network structure can be extremely valuable to adversaries and should be well protec

2. *The Importance of Informal Intellectual Collaboration with Central Colleagues*“ (with Daniel Opolot, University of Cape Town, and Michael E. Rose, University of Cape Town). Avail on [SSRN](#)

**Abstract:**

When preparing a research article, academics engage in informal intellect collaboration by asking their colleagues for feedback. This collaboration gives rise social network between academics. We study whether informal intellectual collabora with an academic who is more central in this social network results in a research ar having higher scientific impact. To address the well-known reflection problem estimating network effects, we use the assignment of discussants at NBER sum institutes as a quasi-natural experiment. We show that manuscripts discussed b discussant with a 10% higher than average Bonacich centrality rank results in 1.4% n citations and a 5% higher probability that an article is published in a top journal illustrate our results, we develop a structural model in which a positive externality i intellectual collaboration implies that collaborating with a more central colleague res in larger scientific impact of the research article.

3. *„Managing Duration Gaps: The Role of Interbank Markets“* (with Marcel Bluhm, Xiamei University, and Jan-Pieter Krahnen, Goethe University Frankfurt). Submitted. Availat [Deutsche Bundesbank Discussion Paper 16/2016](#) (2016)

**Abstract:**

We explore the economics of interbank lending and borrowing, exploiting comprehensive data set of interbank exposures in Germany over the period 2002-2015. Our findings suggest that interbank borrowing and lending play a significant role in final allocation of interest rate risk in the economy. A typical bank in our sample h significant amounts of interbank exposure on both sides of its balance sheet. The aver contract length is well above two years, in contrast to the view that interbank mar mainly supply overnight funding liquidity. Based on dynamic panel regressions we three main results. First, the formation of a bank's interbank book is closely related to dynamics of the bank's client book. Second, by accessing the interbank market, ba tend to reduce their overall duration gap and their exposure to interest rate risk. Th the central bank absorbs a significant share of the interest rate risk inherent in banking system, particularly since the global financial crisis. On the policy level, findings suggest a role for interbank markets in managing duration gap risk of indivi banks as well as the entire banking system. This offers a macro-prudential rational expansive or contractive monetary policy.

4. *"A Network View on Interbank Liquidity"* (with Silvia Gabrieli, Banque de France), Banq

de France Working Paper 531 / Deutsche Bundesbank Discussion Paper 44 (2015)  
Submitted. Latest version on [SSRN](#)

**Abstract:**

The euro area overnight interbank market is best described as a network of over-the-counter lending relationships. We study liquidity reallocation in this interbank network using a novel dataset of all interbank loans settled between European banks. Our results show the existence of a network-pricing channel in over-the-counter markets: a bank's importance in the interbank network, measured by its centrality, has an economically significant effect on its liquidity provision and access. The effect is stronger for the provision of liquidity than for the volume, and stronger for liquidity provision than for liquidity access.

5. „*Mirror, Mirror, on the Wall, Who is the Most Central of Them All?*“ (with Michael Rose, University of Cape Town). Available on [SSRN](#) (2015)

**Abstract:**

In academia, informal collaboration is an integral element in the production of knowledge. We construct the social network of informal collaboration using acknowledgments of 2782 scholarly articles published in six journals in financial economics. We rank financial economists according to their centrality in the social network of informal collaboration and find that central commentators are not necessarily the most central or the most productive authors. We explore the determinants of centrality rankings using detailed CV data for the most central academics. A PhD from a better-ranked department is associated with a better centrality ranking. Seniority is associated with worse rankings, albeit at a decreasing rate.

6. „*Illiquidity Spirals in Coupled Over-the-Counter Markets*“ (with Christoph Aymanns, LSE and Ben Golub, Harvard). Submitted. Available on [SSRN](#) (2016)

**Abstract:**

Banks provide intermediation of two economically coupled assets, each traded on an OTC market—e.g., secured debt and the underlying collateral. We model banks' decision to provide liquidity as a game of strategic complements on two coupled trading networks. Incentives to be active in one network are increasing in its neighbors' activity in the other networks. When an exogenous shock renders some banks inactive, other banks follow, leading to an illiquidity spiral across the two networks. Liquidity can be improved if one of the OTC markets is replaced by an exchange. For a class of market structures associated with random graphs, liquidity changes discontinuously in the size of an exogenous shock, in contrast to contagion on one network.

## WORK IN PROGRESS

1. „*The Cape of Good Homes: Foreign Demand and House Prices in Cape Town*“ (with Allan Davids, UCT)
2. „*Aggregate Liquidity Risk and Bank Portfolio Choice*“ (with Toni Ahnert, Bank of Canada and Gideon du Rand, Stellenbosch)
3. „*Measuring Regulatory Complexity*“ (with Jean-Edouard Colliard, HEC Paris)

## AWARDS AND GRANTS

|      |  |
|------|--|
| 2015 | Institut Louis Bachelier Grant for „Measuring Regulatory Complexity“ with Jean-Edouard Colliard, HEC Paris (10.000EUR)                 |
| 2015 | „Quantitative Easing and Financial (In-)Stability“ – Volkswagen Foundation; Principle Investigator: Lorian Pelizzon, Goethe University |

|                  |   |

## ACTIVITIES AND MEMBERSHIP

*Referee for:* **RoF, JFI, JEDC, JEEA, Operations Research, JEBO, JFS, JBF, IJCB, Journal of Financial Regulation, BE Journal of Macroeconomics, JEIC, Review of Development Finance, African Finance Journal, South African Journal of Economics, Computational Economics, Economic Transition, Emerging Markets Review, Journal of Statistical Mechanics, IEEE Transactions on Knowledge and Data Engineering**

*Also referee for:* **National Research Foundation (SA), Swiss National Fund, ECB Working Paper Series, Bank of England Working Paper Series, ERSA Working Paper Series**

*Academic committee:* **FIRS 2018**

*Membership:* **European Finance Association, Economic Society of South Africa, German Financial Association, German Economic Association, European Economic Association, INET Working Group on Financial Linkages (2012-2015)**

*Conference and Workshop Organization:*

1. **UCT/ERSA/Imperial/RoF Conference on “Banking in Emerging Markets” (Cape Town, 2016)**
2. **BIS/DNB/Bundesbank/RoF Conference on “Global Financial Interconnectedness” (Basel, 2015)**
3. **Bundesbank/IMF/INET Workshop „Interconnectedness: Building Research Into the Policy Agenda“ (Washington, D.C., 2014)**
4. **ERSA Financial Economics Workshop (Cape Town, 2013, Pretoria, 2014, Pretoria, 2015)**
5. **Bundesbank autumn conference „Supervising Banks in a Complex Financial System“ (Frankfurt, 2013)**
6. **Bundesbank/BCBS Workshop „Supervising Financial Networks“ (Frankfurt, 2013)**
7. **Jena Graduate School annual conference 2011 (PhD Workshop, Jena 2011)**

## TEACHING

**Postdoctoral Students (#: first placement):**

1. Suraj Shekhar (PhD Penn State, since 08/2016)
2. Christine Makanza (PhD UCT, since 06/2016)
3. Pawel Fiedor (PhD Krakow, 06/2015 – 06/2016; #: Trainee at European Systemic Risk Board)
4. Hylton Hollander (PhD Stellenbosch, 06/2015 – 01/2016; #: Lecturer at Stellenbosch University)

#### **PhD Students:**

1. Allan Davids (MPhil Stellenbosch, main advisor, since 08/2016)
2. Qobolwakhe Dube (MCom, UCT, since 02/2017, co-advisor)
3. Gideon du Rand (MSc Stellenbosch, 04/2015-)
4. Nolwazi Hlophe (MCom Pretoria, main advisor, since 02/2017, part-time; Bank of Swaziland Financial Stability Department)
5. Chernay Johnson (MSc Wits, 02/2017-, co-advisor)
6. Tina Koziol (MBusSc Jena, main advisor, since 04/2016)
7. Esti Kemp (MPhil Pretoria, main advisor, since 04/2016, part-time; SARB Financial Stability Department)
8. Michael Rose (MSc Kiel, main advisor, since 04/2015)

**Other Students:** 4 MBA Students (UCT GSB, 2013-2014), 1 MComm Students (UCT GSB, 2015), 2 Diploma Students (FSU Jena, 2012)

#### **Teaching**

1. Fintech and Cryptocurrencies (MPhil in Data Science of Financial Technology), University of Cape Town, (2018\*)
2. Financial Software Engineering (MPhil in Data Science of Financial Technology), University of Cape Town, (2018\*)
3. Financial Regulation (MCom in Risk Management of Financial Markets), University of Cape Town (2016, 2017)
4. Econometrics (MCom in Risk Management of Financial Markets), University of Cape Town (2016, 2017)
5. ECO3021S - Quantitative Methods in Economics (Module on Econometrics), University of Cape Town (2015)
6. Economics for MBA Students, University of Cape Town Graduate School of Business, (2014)
7. Seminar, „Business Cycle Theory and Policy“, Friedrich-Schiller-Universität Jena, (SS 2008)
8. Teaching Assistant, „Macroeconomics“, Friedrich-Schiller-Universität Jena, (SS 2008)

*Other Teaching:* WEHIA 2016 Summer School, Universitat Jaume I, (2016), Financial Networks in Emerging Countries, Bank of Uganda, Banco Central do Brazil, (2013), Complexity Economics Summer School, IMT Lucca, (2012), Workshop, „Banking and Modern Financial Economics“, University of Pretoria, (2011)
