EMPLOYMENT

Since 11/2014	University of Cape Town Senior Lecturer, African Institute of Financial Markets and Risk Management, and School of Economics
06/2013 – 10/2014	Old Mutual Emerging Markets Lecturer, Graduate School of Business
Since 06/2012	Deutsche Bundesbank Research Economist in Banking Supervision and -Regulation (part-time since 06/2013)

ACADEMIC POSITIONS

Since 06/2014	Goethe University Frankfurt Research Associate, Excellence Cluster SAFE, House of Finance
Since 12/2016 03/2012-03/2014	Oxford University Research Associate, Oxford Martin School for the 21st Century (INET) Collaborating Research Scholar, Network Cluster, Keble College
Since 01/2017	Columbia University Affiliate, Center for Global Legal Transformation

EDUCATION

10/2011 – 06/2012	Universidad Carlos III de Madrid Postdoctoral Researcher, Interdisciplinary Group of Complex Systems Research, Departamento de Matemáticas
05/2008 – 09/2011	Friedrich-Schiller-Universität Jena PhD in Economics (<i>summa cum laude</i>), Dissertation title: „ <i>Systemic Risk in Interbank Markets</i> “, Supervisor: PD Dr Markus Pasche, Prof Dr Andreas Freytag
02/2011 – 04/2011	New York University Stern School of Business Visiting Scholar (Prof Viral V. Acharya, PhD)
10/2000 - 12/2005	University of Karlsruhe Diploma in Physics (<i>final mark:1.8</i>), Title of diploma thesis: „ <i>Interference Effects in Vector-boson Fusion</i> “, Supervisor: Prof Dr Dieter Zeppenfeld

VISITING POSITIONS

01/2016-02/2016	Columbia Business School (Decision, Risk, and Operations)
-----------------	--

10/2014	MIT (Media Lab)
04/2014 – 05/2014	Princeton University (Bendheim Center for Finance)
1/2014	Federal Reserve Bank of New York (Money & Payments, Financial Institutions, Capital Markets)
12/2012 – 01/2013	Xiamen University (Wang Yanan Institute)
2012 , 2013	University of Oxford (Saïd Business School)

PROFESSIONAL EXPERIENCE AND CONSULTING

Banco Central do Brazil (**2013**), Bank of Uganda (**2013**), Banque de France (**2011**), South African Reserve Bank (**2015, 2011, 2010**), Deutsche Bundesbank (**2010**)

PUBLICATIONS IN PEER-REVIEWED JOURNALS

1. „Contagious Herding and Endogenous Network Formation in Financial Networks“ (with Christoph Aymanns, Oxford), *Journal of Banking and Finance* 50(1), 273-285, (**2015**)

WORKING PAPERS

1. *The Importance of Informal Intellectual Collaboration with Central Colleagues*“ (with Michael E. Rose, University of Cape Town). Available on [SSRN](#)
Abstract:
Co-authorship is a form of formal intellectual collaboration in academia and is well researched. But most intellectual collaboration among academics, for example the provision of helpful commentary on a colleague's manuscript, is informal and not well understood. In this paper, we study social network effects in informal intellectual collaboration in financial economics. We reconstruct the social network of financial economics from formal and informal collaboration among financial economists using a

novel and unique hand-collected dataset based on all publications in six leading journals in financial economics from 1997-2011. Our hypothesis is that informally collaborating with a colleague who is more central in the social network of financial economics improves the scientific impact of a research article. Treating the assignment of discussants at NBER summer institutes as quasi-natural experiment, we show that an increase in the discussant's eigenvector centrality by about 12.5% from the mean is associated with 2% more citations for an average research article.

2. „*Interbank Intermediation*“ (with Marcel Bluhm, Xiamen University, and Jan-Pieter Krahen, Goethe University Frankfurt). Available as [Deutsche Bundesbank Discussion Paper 16/2016](#) (2016)

Abstract:

This paper explores the economics of interbank lending and borrowing using bank-balance sheet data for Germany, the largest European economy. Our 2002- 2014 panel data set allows us to analyze the cross section and the dynamics of the observed interbank exposures. Our findings suggest a genuine intermediation process within the banking system, with implications for allocative efficiency and financial stability. A typical bank in our sample holds a significant amount of term and overnight interbank positions on both sides of the balance sheet simultaneously, and at any point in time. The average contract length in the German interbank market is well above one year, which stands in contrast to the widely held view that interbank exposures are largely overnight. Based on panel regressions, we find the build-up of the interbank book to be driven by innovations in the client book (i.e. non-bank deposit taking and lending). The resulting interbank book affects the bank's duration gap, the maturity disparity between bank assets and bank liabilities. A bank's duration gap is often seen as its major macroeconomic risk factor. Overall our findings lend support to a theory of banking that involves leverage stacks, i.e. intermediation among banks.

3. "*A Network View on Interbank Liquidity*" (with Silvia Gabrieli, Banque de France), Banque de France Working Paper 531 / Deutsche Bundesbank Discussion Paper 44 (2014), Latest version on [SSRN](#)

Abstract:

The euro area overnight interbank market is best described as a network of over-the-counter lending relationships. We study liquidity reallocation in this interbank network using a novel dataset of all interbank loans settled between European banks. We show the existence of a network-pricing channel in over-the-counter markets: a bank's importance in the interbank network, measured by its centrality, has an economically significant effect on its liquidity provision and access. The effect is stronger for the price of liquidity than for the volume, and stronger for liquidity provision than for liquidity access.

4. „*Mirror, Mirror, on the Wall, Who is the Most Central of Them All?*“ (with Michael Rose, University of Cape Town). Available on [SSRN](#) (2015)

Abstract:

In academia, informal collaboration is an integral element in the production of knowledge. We construct the social network of informal collaboration using acknowledgments of 2782 scholarly articles published in six journals in financial economics. We rank financial economists according to their centrality in the social network of informal collaboration and find that central commenters are not necessarily the most central or the most productive authors. We explore the determinants of high

centrality rankings using detailed CV data for the most central academics. A PhD from a better-ranked department is associated with a better centrality ranking. Seniority is associated with worse rankings, albeit at a decreasing rate.

5. „*Information Contagion and Systemic Risk*“ (with Toni Ahnert, Bank of Canada). Available on [SSRN](#) (2015) [Revision requested, Journal of Financial Stability]

Abstract:

We examine the effect of ex-post information contagion on the ex-ante optimal portfolio choices of banks and the welfare losses due to joint default. Because of counterparty risk and common exposures, bad news about one bank reveals valuable information about another bank, thereby triggering information contagion. Systemic risk is defined as the ex-ante probability of joint bank default ex post. We find that information contagion increases systemic risk when banks are subject to common exposures since portfolio adjustments are small. In contrast, when banks are subject to counterparty risk, information contagion induces a large shift toward more prudential portfolios and therefore reduces systemic risk.

6. „*Illiquidity Spirals in Coupled Over-the-Counter Markets*“ (with Christoph Aymanns, LSE, and Ben Golub, Harvard). Available on [SSRN](#) (2016)

Abstract:

We provide a novel explanation for the fragility of liquidity in certain repo and collateral markets. These markets are linked due to a destabilizing spiral between market and funding liquidity. We study how the over-the-counter nature of many repo and collateral markets affects such illiquidity spirals. In particular, we model liquidity provided by intermediaries (banks) as the equilibrium outcome of a static game on two directed networks representing the OTC repo and collateral markets. We show that for a large set of different OTC market structures, there exists an illiquidity spiral such that additional banks withdraw from the markets after an initial exogenous shock renders some banks unable to trade. Furthermore, for certain market structures, we find that liquidity may evaporate abruptly following an exogenous shock. Finally, when one of the two markets is replaced by a centralized exchange, post-shock liquidity is always greater than in the full OTC case.

WORK IN PROGRESS

1. „*Aggregate Liquidity Risk and Bank Portfolio Choice*“ (with Toni Ahnert, Bank of Canada, and Gideon du Rand, Stellenbosch)
2. „*Measuring Regulatory Complexity*“ (with Jean-Edouard Colliard, HEC Paris)

AWARDS AND GRANTS

2015	Institut Louis Bachelier Grant for „Measuring Regulatory Complexity“, with Jean-Edouard Colliard, HEC Paris (10.000EUR)
2015	„Quantitative Easing and Financial (In-)Stability“ – Volkswagen Foundation; Principle Investigator: Lorian Pelizzon, Goethe University Frankfurt. (UCT: 110.000EUR of project total: 770.000EUR)
2012	Sustainable Architecture for Finance in Europe – SAFE excellence cluster at Goethe University Frankfurt, with Marcel Bluhm (PI) and Jan-Pieter Krahnen (20.000EUR)
2011	European Central Bank, Lamfalussy Fellowship (10.000EUR)
2011	17 th International Conference on Computing in Economics (CEF2011),

2009-2011	San Francisco, Best Student Paper Prize, finalist
2005	Graduate School „ <i>Foundations of Global Financial Markets – Stability and Change</i> “, PhD fellowship
2004	Argonne National Lab, Argonne, IL, Travel Grant Albert-Einstein-Institute Golm, Travel Grant

CONFERENCE PRESENTATIONS (*=scheduled)

2016	Bank of England CCBS Workshop, London, MIT Center for Finance and Policy 3rd Annual Conference: " <i>Causes of and Policy Responses to the U.S. Financial Crisis: What Do We Know Now that the Dust Has Settled?</i> ", Boston, MA, Riksbank conference on „ <i>Challenges in Interconnected Financial Systems</i> “, Stockholm, European Economic Association Meetings, Geneva, GRI Fields Conference „ <i>The Stability of Financial Systems</i> “, Toronto, Federal Reserve „ <i>Day Ahead Conference</i> “, San Francisco

ACTIVITIES AND MEMBERSHIP

Referee for: Review of Finance, Journal of Financial Intermediation, Journal of Economic Dynamics and Control, Operations Research, Journal of Economic Behaviour and Organization, Journal of Financial Stability, Journal of Banking and Finance, International Journal of Central Banking, Journal of Financial Regulation, BE Journal of Macroeconomics, Journal of Economic Interaction and Control, Review of Development Finance, African Finance Journal, South African Journal of Economics, Computational Economics, Economics in Transition, Emerging Markets Review, Journal of Statistical Mechanics, IEEE Transactions on Knowledge and Data Engineering

Also referee for: National Research Foundation (SA), Swiss National Fund, ECB Working Paper Series, Bank of England Working Paper Series, ERS Working Paper Series

Membership: European Finance Association, Economic Society of South Africa, German Finance Association, German Economic Association, European Economic Association, INET Working Group on Financial Linkages (**2012-2015**)

Conference and Workshop Organization:

1. UCT/ERSA/Imperial/RoF Conference on “*Banking in Emerging Markets*” (Cape Town, **2016**)
2. BIS/DNB/Bundesbank/RoF Conference on “*Global Financial Interconnectedness*” (Basle, **2015**)
3. Bundesbank/IMF/INET Workshop „*Interconnectedness: Building Research Into the Policy Agenda*“ (Washington, D.C., **2014**)
4. ERS Working Financial Economics Workshop (Cape Town, **2013**, Pretoria, **2014**, Pretoria, **2015**)
5. Bundesbank autumn conference „*Supervising Banks in a Complex Financial System*“ (Frankfurt, **2013**)
6. Bundesbank/BCBS Workshop „*Supervising Financial Networks*“ (Frankfurt, **2013**)
7. Jena Graduate School annual conference 2011 (PhD Workshop, Jena **2011**)

TEACHING

Postdoctoral Students (#: first placement):

1. Suraj Shekhar (PhD Penn State, since 08/2016)
2. Christine Makanza (PhD UCT, since 06/2016)
3. Pawel Fiedor (PhD Krakow, 06/2015 – 06/2016; #: Trainee at European Systemic Risk Board)
4. Hylton Hollander (PhD Stellenbosch, 06/2015 – 01/2016; #: Lecturer at Stellenbosch University)

PhD Students:

1. Allan Davids (MPhil Stellenbosch, main advisor, since 08/2016)
2. Tina Koziol (MBusSc Jena, main advisor, since 04/2016)
3. Esti Kemp (MPhil Pretoria, main advisor, since 04/2016, part-time; SARB Financial Stability Department)
4. Michael Rose (MSc Kiel, main advisor, since 04/2015)
5. Gideon du Rand (MPhil Stellenbosch, co-advisor, since 04/2015)

Other Students: 4 MBA Students (UCT GSB, 2013-2014), 1 MComm Students (UCT GSB, 2015), 2 Diploma Students (FSU Jena, 2012)

Teaching

1. ECO3021S - Quantitative Methods in Economics (Module on Econometrics), University of Cape Town (**2015**)
2. Economics for MBA Students, University of Cape Town Graduate School of Business, (**2014**)
3. Seminar, „*Business Cycle Theory and Policy*“, Friedrich-Schiller-Universität Jena, (**SS 2009**)
4. Teaching Assistant, „*Macroeconomics*“, Friedrich-Schiller-Universität Jena, (**SS 2008**)

Other Teaching: WEHIA 2016 Summer School, Universitat Jaume I, (**2016**), Financial Networks in Emerging Countries, Bank of Uganda, Banco Central do Brazil, (**2013**), Complexity Economics Summer School, IMT Lucca, (**2012**), Workshop, „*Banking and Modern Financial Economics*“, University of Pretoria, (**2011**)

MEDIA APPEARANCES

TV: CNBC Africa, News24.com, Business Day TV

Radio: Talk702.com, Voice of the Cape FM

Newspaper/News Websites: CNN, Business Day, BDLive, Times, Times Live Crain's New York Business, The Conversation, EWN, Independent Online, The Sowetan

COMPUTER SKILLS AND SOFTWARE DEVELOPMENT

Software Development:

central-places.net – Website accompanying our projects on informal collaboration in academia, with Michael Rose (UCT). Available at: <http://www.central-places.net/>

Supervisory Data Explorer – Proprietary visualization software for supervisory financial network data (**2015**), with Peter Sarlin (RiskLab Finland, Infolytika), Sharat Akhoury (UCT), and Dieter Wang (University of Amsterdam)

NetGen – An open source financial networks cleaning and analysis tool (**2014**), with Tarik Roukny (ULB). Available at: <http://www.netgen-toolbox.org/>

BlackRhino – An open source financial multi-agent simulation (**2013**)
Available at: https://github.com/cogeorg/black_rhino

Programming Languages: Python, C++, Java, Perl, Fortran, PHP, JavaScript

09/2001 – 07/2003 University of Karlsruhe, Steinbuch Center for Computing, Research Assistant
